---

Summary of Experience

Frontend developer and WordPress implementer with over 4 years of experience designing and building responsive websites using WordPress and React.js. Skilled in modern frontend technologies (React, JSX, state management, component-based architecture), advanced WordPress plugins, and UI/UX principles. Also experienced in using Python to automate repetitive tasks and improve workflows.

Skills

- WordPress: Designing and managing websites with advanced plugins such as Elementor, Yoast, ACF, WooCommerce, Jet Plugins, WPML
- Themes: Working with premium themes (Woodmart, Astra, Hello, Seven)
- Customization: Creating custom designs using HTML/CSS
- Responsive Design: Building mobile-friendly, cross-browser layouts
- Performance: Configuring security, backups, and performance optimization
- Frontend: HTML5, CSS3, Flexbox, CSS Grid
- PHP: Familiar with PHP and WordPress theme development
- React.js: Implementing UI components, managing state, integrating APIs
- Next.js: Basic understanding of routing, SSR, and project structure
- Version Control: Using Git and GitHub in collaborative projects
- Python: Writing scripts to automate tasks like data processing and file handling
- Design Tools: Intermediate with Photoshop and Adobe XD; beginner-level in Illustrator and Figma
